Mr. Whitman - you requested that I provide you and Jae Douglas with an attorney contact at EPA for possible coordination on the potential public release of forestry pesticide application records should they come into EPA's possession through the State's record's request. Our contact is Julianne Matthews, Office of Regional Counsel, at 206-553-1169. Julie is well-versed in both FOIA and FIFRA law. In making the determination of releasability, please keep in mind that at the community meeting, Oregon agency representatives stated that these records were being requested from the landowners and that they would then be released to those individuals who had already requested them. Please let me know if I can assist you further. Scott
